Mid-Atlantic Flood Potential

Decision Support Briefing #2
As of: Noon, May 17th

What Has Changed?
✓ Flooding at a few locations overnight
✓ Extended forecasts into Sunday
**HAZARD:**  Heavy Rain and River Flooding

**IMPACTS:**  Potential for widespread moderate flooding with MAJOR flooding possible at some locations, especially in the Potomac River basin. This has the potential to be the most significant flooding on the Potomac since March 2010.

**LOCATION:**  Highest flood potential is the entire Potomac River basin in West Virginia, Maryland, Virginia, and Washington DC up thru southern Pennsylvania and into New Jersey

**TIMING:**  Some flooding began overnight. Highest potential is Friday into the weekend

**RAINFALL:**  Some spots have already seen 5+ inches of rain over the past several nights particularly in the Frederick MD to Martinsburg WV area. Another 3+ inches of rain is expected the next several days across much of Maryland and Virginia with some areas of 5+ inches

**NOTES:**  This briefing primarily addresses river flooding. Small stream and coastal flooding is also likely in this event.
Overnight reports of nearly 5 inches of rain were recorded in the eastern panhandle of West Virginia.

Over the past several days, a large part of the Potomac River basin has seen 3 inches or more of rain.
3-5 inches of rain is expected over the next 72 hours from West Virginia through southern New Jersey.

Locally heavier amounts can also be expected in stronger storm regions.
Flood Statements

- Flood warnings have been issued for flooding that began last night at
  - Opequon Creek (WV)
  - Brandywine Creek (PA)

- Flood watches are in place for much of the region from West Virginia across to New Jersey
River Forecasts

Flood Forecasts:
- Brandywine Creek (PA)
- Neshaminy Creek (PA)
- Aughwick Creek (PA)
- Coodoguinet Creek (PA)
