Mathar Summary			Weather Sum	mary					

Widespread convection ahead of a slow-moving cold front produced locally excessive rainfall amid a very humid air mass. Localized rainfall of 5-6"+ was reported in parts of Pennsylvania, Virginia, and New Jersey, resulting in numerous reports of flash flooding - including a Flash Flood Emergency around Petersburg, VA and two flood fatalities near Plainfield, NJ. Minor river flooding occurred at two MARFC forecast locations in New Jersey, both in the Passaic River basin.
