 Number of Floods Cresting in **Moderate** Range - **0**
 Number of Floods Cresting in **Major** Range - **0**
 Number of Floods Cresting in **Missing** Range - **0**
MARFC Power Ranking - 3 (Minor = 1 - Moderate = 5 - Major = 10 - Missing =1)
 Number of MARFC records - **0**
 E = Estimated

Weather Summary

A slow-moving low pressure system brought widespread thunderstorms to eastern PA, northern NJ and parts of NY Tuesday July 28th and Wednesday July 29th. Heavy rain fell over a couple of different time periods in the Upper Delaware River basins with one round during the afternoon through the middle of the Cooks Falls basin and another period of rain in the evening/overnight. This led to a minor flood at Cooks Falls and Hancock. Heavy rain also fell over the Passaic with one round on the afternoon of the 28th and another round of rain in the evening. This led to a steady rise at Lodi and an eventual crest about a half foot over minor flood stage on the morning of the 29th.
