### **Buoys**

41010--If you are not a Facebook friend of ours, you likely do not know that this buoy washed up in Spain in February—yes Spain! Check out [our post](#) about it. We have not received any news about if/when the buoy will be redeployed.

41012--was decommissioned in February and there are no plans to redeploy it at the present time.

### **Springtime Breezy Conditions**

A boating accident in the Stick Marsh March 13<sup>th</sup> caused one fatality. We had a Lake Wind Advisory in effect. The March-April period often catches boaters off guard as evidenced by a graphic I put together for [Weather-Related Boating Fatalities](#)

### **Nearshore Wave Prediction System**

Our local wave model is run twice a day. There are some nice graphics available [here!](#)
