Subject: National Tsunami Warning Center Routine Communications Tests for
the West Coast and Alaska Coast to Take Place on February 13, 2020

The NWS National Tsunami Warning Center (NTWC) and coastal NWS Weather
Forecast Offices (WFOs) will perform routine monthly tsunami
communication tests to ensure end-to-end readiness of NWS dissemination
software and hardware on Thursday, February 13, 2020, for Alaska and West
Coast states.

The intended recipients of these communication tests include designated
national focal points, state/territorial warning points, coastal WFOs,
U.S. Coast Guard and critical military dissemination points.

Each test message will be clearly identified as such, and will be
consistent with the product changes implemented by:

https://www.weather.gov/media/notification/pdfs/scn18-94vtec_tsunami.pdf

Valid Time Event Code (VTEC) codes for the test messages will start with
the /T fixed identifier (versus /O for operational messages). To provide
additional assurance that a test message is not inadvertently distributed
as an actual Warning/Advisory/Watch product, Event Tracking Numbers
(ETNs) for the test messages will begin with 9 as the leading digit of
the four character code.

The text products affected by routine monthly tsunami communication
testing are the national tsunami products issued under the following
Advanced Weather Interactive Processing System (AWIPS) Product
Identifiers (PILs) and World Meteorological Organization (WMO)
Identifiers (IDs):

NTWC Product	AWIPS PIL	WMO ID
-----	-----	-----
Segmented Tsunami W/W/A for West Coast/BC/Alaska	TSUWCA	WEPA41
Public Tsunami W/W/A for West Coast/BC/Alaska	TSUAK1	WEAK51
