Subject: Updated: Soliciting Comments on Proposal to Change Small Craft
Advisory to Small Craft Warning through August 31, 2020

Updated to extend deadline to August 31, 2020.

The NWS is considering a major change to the Watch, Warning and Advisory
(WWA) system (for information on this and other proposed changes, see:
<https://www.weather.gov/hazardsimplification/>).

The proposed new system would remove the terms "Advisory," "Special
Weather Statement," and "NOWcast" as headlines, and streamline all sub-
Watch and sub-Warning information into a single, plain-language
Statement, with a few exceptions. One exception to this change includes
the marine Small Craft Advisory (SCA), one of the advisories included in
the Marine Weather Message (MWW) product and the Coastal Waters Forecast
(CWF) product.

Due to the critical nature and use of the information of the Small Craft
Advisory and that associated conditions require vessels of a certain size
to take protective action, NWS proposes to rename this advisory to Small
Craft Warning instead of converting it to a plain-language statement.
The NWS regional criteria for issuing Small Craft Warnings would remain
the same as it is for Small Craft Advisories.

Here is a link to the current regional SCA criteria:

<https://www.weather.gov/marine/faq#13>

At this time, the NWS is soliciting specific feedback on the proposal to
change a Small Craft Advisory to a Small Craft Warning, including the
headlines.

A description of the proposal to change Small Craft Advisory to Small
Craft Warning, product examples, and requirements explanation can be
found at the following link:

https://nws.weather.gov/products/PDD/PDD_ProposaltoChangeSmallCraftAdvisorytoWarning_2020.pdf

To provide feedback to this proposal, take the survey at:
