Subject: Soliciting Comments on Aviation Website Upgrade through October
 31, 2022

The NWS is soliciting comments through October 31, 2022 on a significant upgrade to the Aviation Weather Center's website (www.aviationweather.gov). A preview of the upgraded site is available through the comment period at:

<https://beta.aviationweather.gov>

The upgrade improves the website's consistency, supportability, mobile friendliness, performance, and ease of use. The information on the upgraded website will be similar to the current website, but the navigation and presentation is adaptable to permit use on mobile devices. Additionally, the new website merges the legacy Helicopter Emergency Medical Services (HEMS) tool into the same framework as the Graphical Forecasts for Aviation while keeping its focus on low-altitude flight.

Users can find additional information and tutorials at:
<https://beta.aviationweather.gov/help>.

For additional information, please see the Product Description Document (PDD) at:
[https://nws.weather.gov/products/PDD/PDD_ExpUpgradeofAviationweather.gov BetaSite 2022.pdf](https://nws.weather.gov/products/PDD/PDD_ExpUpgradeofAviationweather.gov_BetaSite_2022.pdf)

Comments will be accepted through October 31, 2022 on the proposed operational implementation of this upgrade as a replacement for the existing website at: <https://www.aviationweather.gov>. Comments and feedback can be submitted via the following online survey:

<https://www.surveymonkey.com/r/AviationweatherBetaSite>

If you have questions or comments regarding this upgrade, please contact:
