Subject: NWS to Issue National Tsunami Warning Center Routine
 Communications Tests for the East and Gulf Coast in Conjunction
 with the LANTEX22 Tsunami Exercise on June 1, 2022

The NWS National Tsunami Warning Center (NTWC) and coastal NWS Weather Forecast Offices (WFOs) will perform routine monthly tsunami communication tests in conjunction with the LANTEX22 exercise to ensure end-to-end readiness of NWS dissemination software and hardware on Wednesday, June 1, 2022, for East and Gulf Coast states.

The LANTEX22 Participant Handbook can be found here:
<https://tsunami.gov/exercises/Lantex22Final.pdf>

The intended recipients of these communication tests include designated national focal points, state/territorial warning points, coastal WFOs, U.S. Coast Guard, and critical military dissemination points.

VTEC codes for the test messages will start with the /T fixed identifier versus /O for operational messages. To provide additional assurance that a test message is not inadvertently distributed as an actual Warning/Advisory/Watch product, Event Tracking Numbers (ETN) for the test messages will begin with 9 as the leading digit of the four character code.

The text products affected by routine monthly tsunami communication testing are the national tsunami products issued under the following AWIPS Product Identifiers (PIL) and World Meteorological Organization (WMO) Identifiers (ID):

NTWC Product	AWIPS PIL	WMO ID
-----	-----	-----
Segmented Tsunami W/W/A for U.S. Atlantic Coast Gulf Coast, and Canada East Coast	TSUAT1	WEXX20
Public Tsunami W/W/A for U.S. Atlantic Coast	TSUATE	WEXX30
