From: Michelle Mainelli, Director
Office of Dissemination

Subject: Changes to NWS Dissemination Webpage URLs effective October 31, 2019

On or about Thursday, October 31, 2019, at 8:00 AM Central Daylight Time (CDT), 1300 Coordinated Universal Time (UTC), the NWS will change public facing dissemination system webpage URL base address locations; migrating from:
https://www.nws.noaa.gov
to
https://www.weather.gov

After this change, all the affected dissemination system webpage links currently re-directed to the new locations will cease to function. Thereafter, users will see a 404 error when attempting to access the old URL base address for each respective dissemination system.

The affected dissemination system URLs include:
https://www.nws.noaa.gov/nwr
https://www.nws.noaa.gov/nwws
https://www.nws.noaa.gov/emwin
https://www.nws.noaa.gov/iscs

and all subordinate webpage URLs.

All NWS partners and users will need to make necessary changes to saved URLs.

Updated alerts and warnings remain online at:
https://www.weather.gov
https://alerts.weather.gov

For more information, please contact:

Gregory Zwicker
Program Manager
