Service Change Notice 20-39
National Weather Service Headquarters Silver Spring MD
120 PM EDT Wed Mar 1 2020

To: Subscribers:
 -NOAA Weather Wire Service
 -Emergency Managers Weather Information Network
 -NOAAPort
 Other NWS Partners, Users and Employees

From: Ben Kyger
 Director, NCEP Central Operations

Subject: Changes to NWS SDM Administrative Message Product Headers and
Request for Comments to be Implemented on or After April 30, 2020

The Senior Duty Meteorologist (SDM) updates users regarding the real-time status of NWS technical operations via administrative messages with World Meteorological Organization (WMO) header NOUS42 KWNO and Advanced Weather Information Processing System (AWIPS) product identifier ADMNFD.

Effective on or after April 30, 2020, NCEP Central Operations will separate the NOUS42 KWNO ADMNFD product into two new products:

- An Alert Administrative Message (ADASDM) for significant operational outages/degradation and other critical updates, and
- An Administrative Message (ADMSDM) for more routine notifications.

This will allow wider dissemination and greater visibility of the most urgent updates, and more targeted distribution of other updates.

The current NWS SDM Administrative Message to be discontinued:
NOUS42 KWNO ADMNFD

Replaced by:
NOUS42 KWNO ADASDM
NOUS42 KWNO ADMSDM

Any questions, comments, or requests regarding this change should be directed to the contact below. We will review any feedback and decide whether to proceed.

Robert Handel
Senior Duty Meteorologist Team Lead
