From: CAPT James Crocker, NOAA
 Acting Director, Surface and Upper Air Division
 Office of Observations

Subject: Datum Revised for Upper Air Release Point at Green Bay,
 Wisconsin

The NWS Weather Forecast Office (WFO) in Green Bay, WI, (KGRB) has completed the move of the Upper Air inflation shelter. After four weeks, the Upper Air observations have resumed August 18, 2020, from the new release point.

Please update your metadata files as soon as possible so your Upper Air derived products will not give erroneous information.

Table 1. New Coordinates of Green Bay (KGRB) Release Point

LATITUDE	LONGITUDE	ELEVATION
-----	-----	-----
44.498258	-88.110576	207.049 M

NOTE: There is no change to the operational Upper Air system in this facility move at KGRB. The World Meteorological Organization (WMO) Index Number will continue to be 72645. All other Upper Air station data remains the same. If the datum values are revised pending final analysis, then an update to this SCN will be issued.

If you have any questions regarding the change, contact:

Hiram Escabi, Jr., NCE, CET
Upper Air Program Manager
NWS Program Management Branch W/OBS31
Silver Spring, MD
