Subject: Add GOES-17 ASOS Satellite Cloud Product to the Satellite Broadcast Network (SBN or NOAAPort) on or after September 28, 2020.

Effective on or after September 28, 2020, Automated Surface Observing System (ASOS) Satellite Cloud Products (SCP) from the Geostationary Operational Environmental Satellite-17 (GOES-17, a.k.a., GOES-West) will be added to the SBN.

Specific changes:
On or after September 28, 2020, transmission of the following hourly GOES-17 derived ASOS Satellite Cloud Products (SCP) will commence:

<table>
<thead>
<tr>
<th>WMO ID</th>
<th>AWIPS ID (Region#)</th>
<th>Data Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCUS51 KNES</td>
<td>SCPCR2 (CR #2)</td>
<td>26.5 kB/hr</td>
</tr>
<tr>
<td>TCUS52 KNES</td>
<td>SCPSR2 (SR #2)</td>
<td>20.2 kB/hr</td>
</tr>
<tr>
<td>TCUS53 KNES</td>
<td>SCPWR2 (WR #2)</td>
<td>14.5 kB/hr</td>
</tr>
<tr>
<td>TCUS54 KNES</td>
<td>SCPPR2 (PR #2)</td>
<td>3.6 kB/hr</td>
</tr>
</tbody>
</table>

These hourly products will go on the NOAAPort-OPT channel (Port 1204, PID 104).

NOTE: As of May 27, 2020, the following ASOS SCPs from GOES-16 have also been available via NOAAPort:

<table>
<thead>
<tr>
<th>WMO ID</th>
<th>AWIPS ID (Region #)</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCUS40 KNES</td>
<td>SCPER1 (ER #1)</td>
</tr>
<tr>
<td>TCUS41 KNES</td>
<td>SCPCR1 (CR #1)</td>
</tr>
</tbody>
</table>
Therefore once the GOES-17 ASOS SCPs are activated, any ASOS location covered by both GOES-16 and GOES-17 ASOS SCPs will receive dual reports if both satellites take valid observations at that location.

The format of the new GOES-17 ASOS SCPs will match that of the GOES-16 ASOS SCPs (and of their predecessors from GOES-15 and GOES-13).

More details regarding the GOES-R ASOS SCP product and region listings by state and region are on the Office of Satellite and Product Operations (OSPO) webpage: https://www.ospo.noaa.gov/Products/atmosphere/soundings/index.html

Critical weather or other factors may delay the activation of these products onto the SBN.
