Service Change Notice 21-54
National Weather Service Headquarters Silver Spring MD
1130 AM EDT Fri May 28 2021

To: Subscribers:
 -NOAA Weather Wire Service
 -Emergency Managers Weather Information Network
 -NOAAPORT
 Other NWS partners and NWS employees

From: Bruce Entwistle
 Chief, Aviation and Space Weather Services Branch

Subject: Updates to the Aeronautical Fixed Telecommunications
 Network (AFTN) on or about June 22, 2021.

The National Weather Service Tele-Communications Gateway (NWSTG), also known as Washington OPMET databank, has been working with the Federal Aviation Administration (FAA) to update the AFTN database and the eight character addresses.

This update is for the following legacy AFTN addresses, which have been identified by National Airspace Data Interchange Network (NADIN) as no longer valid (undeliverable) addresses and will be terminated:

PGUMCOAX Guam, unknown facility
PGUMYAYX Guam, FAA Regional Office or Headquarters
NSTUYYMZ Pago Pago, American Samoa, NWS Meteorological Office
TJNRZWZX Roosevelt Roads Naval Station, Puerto Rico, unknown
 facility
PWAKYFYX Wake Island Airfield, Aeronautical Fixed Station
PWAKYFYT Wake Island Airfield, unknown facility
PGSNYFYX Saipan International Airport, Aeronautical Fixed Station

These legacy addresses carried Operational Aviation messages such as TAF, METAR, and SIGMET. If your Meteorological office or Air Traffic facility has an 8 letter AFTN address, and you need it added to the Washington OPMET data bank for OPMET information, please forward your request to the POC below.

For more information, please contact:

Michael L. Graf
Meteorologist/International Liaison
