Subject: Changes to Marine Forecast Zones for WFO Anchorage,
 AK: Effective March 8, 2023

Effective Wednesday March 8, 2023, by 12:00 PM Alaska Standard Time (AKDT), 2100 Coordinated Universal Time (UTC), the NWS Weather Forecast Office (WFO) in Anchorage, Alaska (AFC) will implement comprehensive changes to coastal and offshore Marine Forecast Zones. All marine forecasts and related products will use the new zone numbers and names shown below.

If March 8, 2023 is declared a Critical Weather Day, this implementation will be postponed to March 9, 2023.

NWS Alaska Region is coordinating a multi-phase effort to facilitate greater targeting of alerts for hazardous marine weather events across the state. As part of this effort, Marine Forecast Zones will be realigned across the state to improve the dissemination of warnings and forecast information. The change of Marine Forecast Zones will result in enhanced safety and more geographically-representative forecasts, advisory, watch, and warning products. This change has been made in coordination with the United States Coast Guard and other partners and stakeholders.

Sea Ice Forecast for Western and Arctic Alaskan Coastal Waters	FZAK80 PAFC	ICEAFC

NWS partners and users should take the appropriate action to ensure systems recognize the new UGCs and new zone alignments and names.

In addition, NOAA Weather Radio All Hazards (NWR) listeners using receivers equipped with Specific Area Message Encoding (SAME) will need to add new SAME location codes to their receivers prior to March 8, 2023. This is a critical requirement in order to continue receiving automated notifications of Special Marine Warnings. The new SAME location codes are included in the updated database for Coastal and Offshore Marine Area and Zone Codes for NWR are online at: <https://www.weather.gov/gis/EasNWR>. Final SAME location codes will be available on January 17, 2023.

Preliminary shapefiles for marine zones are available online at: <https://www.weather.gov/gis/MarineZones>.

Final versions of these shapefiles will be available on January 17, 2023.
