Subject: Changes to Coastal Marine Forecast Zones for WFO Fairbanks, AK: Effective March 8, 2023

Effective Wednesday, March 8, 2023, by 12:00 PM Alaska Standard Time (AKST), 2100 Coordinated Universal Time (UTC), the NWS Weather Forecast Office (WFO) in Fairbanks, AK (AFG) will implement comprehensive changes to coastal Marine Forecast Zones. All marine forecasts and related products will use the new zone numbers and names shown below.

If March 8, 2023 is declared a Critical Weather Day, this implementation will be postponed to March 9, 2023.

NWS Alaska Region is coordinating a multi-phase effort to facilitate greater targeting of alerts for hazardous marine weather events across the state. As part of this effort, Marine Forecast Zones will be realigned across the state to improve the dissemination of warnings and forecast information. The change of coastal Marine Forecast Zones will result in enhanced safety and more geographically-representative forecasts, advisory, watch, and warning products. This change has been made in coordination with the United States Coast Guard and other partners and stakeholders.

Table 1: Current Universal Geographic Codes-Zone (UGCs-Z): Current Coastal Marine Zone Forecast Names

PKZ200: Norton Sound PKZ201: Etolin Strait to Dall Point PKZ210: Dall Point to Wales PKZ215: Kotzebue Sound PKZ220: Wales to Cape Thompson PKZ225: Cape Thompson to Cape Beaufort PKZ230: Cape Beaufort to Point Franklin PKZ235: Point Franklin to Cape Halkett PKZ240: Cape Halkett to Flaxman Island PKZ245: Flaxman Island to Demarcation Point

Table 2: New UGCs: New Coastal Marine Zone Forecast Names _____ PKZ801: Etolin Strait to Dall Point out to 15 NM PKZ802: Dall Point to Kwikpak Pass out to 15 NM PKZ803: Kwikpak Pass to Cape Stephens out to 15 NM PKZ804: Cape Stephens to Moses Point out to 15 NM PKZ805: Moses Point to Sledge Island out to 15 NM PKZ852: Norton Sound greater than 15 NM PKZ850: Etolin Strait to Kwemeluk Pass from 15 to 90 NM PKZ851: Southwest of Saint Lawrence Island from 15 to 100 NM PKZ816: South Side of Saint Lawrence Island out to 15 NM PKZ817: North Side of Saint Lawrence Island out to 15 NM PKZ853: Kwemeluk Pass to Kwikpak Pass from 15 to 90 NM PKZ806: Sledge Island to Wales out to 15 NM PKZ854: Sledge Island to Wales greater than 15 NM PKZ807: Wales to Cape Espenberg out to 15 NM PKZ808: Cape Espenberg to Motherwood Point out to 10 NM PKZ809: Motherwood Point to Cape Krusenstern out to 10 NM PKZ855: Kotzebue Sound greater than 10 NM PKZ810: Cape Krusenstern to Cape Thompson out to 15 NM PKZ856: Wales to Cape Thompson greater than 15 NM PKZ811: Cape Thompson to Cape Beaufort out to 15 NM PKZ857: Cape Thompson to Cape Beaufort from 15 to 85 NM PKZ812: Cape Beaufort to Point Franklin out to 15 NM PKZ858: Cape Beaufort to Point Franklin from 15 to 85 NM PKZ813: Point Franklin to Cape Halkett out to 15 NM PKZ859: Point Franklin to Cape Halkett from 15 to 75 NM PKZ814: Cape Halkett to Flaxman Island out to 15 NM PKZ860: Cape Halkett to Flaxman Island from 15 to 80 NM PKZ815: Flaxman Island to Demarcation Point out to 15 NM PKZ861: Flaxman Island to Demarcation Point from 15 to 75 NM

Table 3: NWS Products Affected by these Marine Zone Changes

Product Name	WMO Heading	AWIPS ID
Coastal Waters Forecast for Arctic Alaska	FZAK51 PAFG	CWFNSB
Coastal Waters Forecast for Northwest Alaska	FZAK52 PAFG	CWFWCZ
Special Marine Warning	WHAK59 PAFG	SMWAFG
Marine Weather Statement	FZAK79 PAFG	MWSAFG
Northern Alaska Forecast Discussion	FXAK69 PAFG	AFDAFG
Sea Ice Forecast for Western and Arctic Alaskan	FZAK80 PAFC	ICEAFC
Coastal Waters		

NWS partners and users should take the appropriate action to ensure systems recognize the new UGCs and new zone alignments and names.

In addition, NOAA Weather Radio All Hazards (NWR) listeners using receivers equipped with Specific Area Message Encoding (SAME) will need to add new SAME location codes to their receivers prior to March 8, 2023. This is a critical requirement in order to continue receiving automated notifications of Special Marine Warnings. The new SAME location codes are included in the updated database for Coastal and Offshore Marine Area and Zone Codes for NWR are online at: https://www.weather.gov/gis/EasNWR. Final SAME location codes will be available on January 17, 2023.

Preliminary shapefiles for marine zones are available online at:

https://www.weather.gov/gis/MarineZones

Final versions of these shapefiles will be available on January 17, 2023.
