Service Change Notice 22-73
National Weather Service Headquarters Silver Spring MD
1130 AM EDT Fri Aug 5 2022

To: Subscribers:
 -NOAA Weather Wire Service
 -Emergency Managers Weather Information Network
 -NOAAPort
 Other NWS partners and NWS employees

FROM: Bruce Entwistle
 Chief, Aviation and Space Weather Services Branch

SUBJECT: Temporary Suspension of the Arkadelphia, AR (KADF) Terminal
 Aerodrome Forecast (TAF) Effective Immediately August 5, 2022
 And Until Further Notice

NOTE: The following change has no impact on NOAA Weather Wire Service
 Subscribers.

Effective August 5, 2022 and until further notice, the National Weather Service Forecast Office in Little Rock, AR has suspended the Terminal Aerodrome Forecast (TAF) for Dexter B. Florence Memorial Field in Arkadelphia, AR (KADF). The KADF automated weather observing equipment that provides routine and special surface observations (METAR and SPECI) is being moved to another building at the airfield. The expected resumption of the KADF METAR and subsequently the KADF TAF is planned for later in 2023.

TAF service requires a constant review of weather conditions, which include weather observations (METAR and SPECI) at the airport. Upon resumption of scheduled observations at Arkadelphia (KADF) Airport, the NWS Little Rock office will resume normal TAF issuances.

For questions regarding this service, please contact:

Paul Witsaman, Aviation Meteorologist
