Subject: Changes to Fire Weather Forecast Zones for WFO Honolulu, HI: Effective March 5, 2024

Effective Tuesday, March 5, 2024, at 11:00 AM Hawaiian Standard Time (HST), 2100 Coordinated Universal Time (UTC), the NWS Weather Forecast Office (WFO) in Honolulu, HI (HFO) will change Fire Weather Forecast Zones on Kauai, Oahu, Molokai, Lanai, Maui, and the Big Island and renumber all fire weather zones in the state of Hawaii.

If March 5, 2024 is declared a Critical Weather Day, this implementation will be postponed to March 6, 2024 at 2100 UTC.

These changes will bring the HFO Fire Weather Forecast Zones in line with the existing Public Weather Forecast Zones in order to capture weather conditions that vary significantly across the terrain of the islands.

Eleven current zones will be converted into 26 separate zones and the boundaries of five other zones will also be adjusted. In addition, all 43 zones will be renumbered to remain numerically sequential. The new zones are listed in Table 2.

Table 1. Universal Geographic Code (UGC): Current Fire Weather Forecast Zone Name

<table>
<thead>
