Updated to reflect the new go-live date of March 28, 2023.

Effective on a date to be determined the NOAA Operational Model Archive and Distribution System (NOMADS) website at https://nomads.ncep.noaa.gov will be upgraded to version 2.2. In the case of a declaration of Critical Weather Day or an Enhanced Weather Event, the implementation will be delayed until the next working day without weather restrictions.

The upgraded NOMADS website will have an updated look and feel for the front page, more in alignment with the rest of the NWS/NCEP enterprise. It will also include new functionality within the grib filter GUI (Graphical User Interface), which will allow users to more easily select what variable/level pairs are valid.

Current scripts that use NOMADS, either to pull full files directly via HTTPS or using the grib filter and openDAP applications, will not be affected.

These changes do NOT affect the following URLs for either HTTPS or FTP access:

- www.ftp.ncep.noaa.gov
- ftpprd.ncep.noaa.gov
- ftp.ncep.noaa.gov
- tgftp.ncep.noaa.gov

NCEP encourages users to ensure their decoders are flexible and are able to adequately handle changes in content order, changes in the scaling factor component within the product definition section (PDS) of the GRIB files, and any volume changes that may be forthcoming. These elements may change with future NCEP model implementations. NCEP will make every attempt to alert users to these changes prior to any implementations.

NCEP will evaluate all user comments and questions.
