              Other NWS Partners, Users, and Employees

From:       Terrance J. Clark, Director  
              NWS WSR-88D Radar Operations Center

Subject: Radar Operations Center Testbed Configuration Identifier  
Changes: Effective on or about September 29, 2025

On or around September 29, 2025, the Radar Operations Center (ROC) will implement new configuration identifiers for the ROC Testbed Radar, KCRI. The changes in the configuration identifiers will be reflected in the National Level II data stream.

The current KCRI configuration identifiers are: NOP3, NOP4, ROP3, ROP4, FOP1, DAN1, and DOP1

The new KCRI configuration identifiers are: NOK1, NOK2, NOK3, NOK4, NOK5, ROK1, ROK2, ROK4, and ROK5

There will be a time period where the KCRI configurations will alternate between the current and new identifiers based on the type of test being conducted. The new configuration identifiers are expected to be fully implemented with RDA/RPG Build 25.0 deployment in early to mid calendar year 2027.
