Subject: Soliciting Comments on Proposed Retirement of Significant
Weather (SIGWX) Low-Level Forecast Product (LLFP) through October 2, 2026

The National Weather Service (NWS) is soliciting comments through October 2, 2026 on the proposed retirement of the SIGWX LLFP, available at https://aviationweather.gov/data/products/fax/sigwx_lo_us.gif .

The SIGWX LLFP is an outdated United States domestic aviation weather product, outside the scope of requirements set by the International Civil Aviation Organization. More modern Low-level aviation hazard information are available in the Graphical Forecasts for Aviation (GFA) tool on AviationWeather.gov as follows:

Ceiling and Visibility Information:
<https://aviationweather.gov/gfa/#cigvis>

Turbulence Information:
<https://aviationweather.gov/gfa/#turb>

Icing and Freezing Level Information:
<https://aviationweather.gov/gfa/#ice>

The proposed retirement date for the SIGWX LLFP is on or about December 15, 2026.

If you have comments or questions, please contact:

Jonathan Leffler
Chief, Operations Division
