Subject: Soliciting Public Comments through November 30, 2026, on the
Proposed Removal of the Experimental NWS Graphics site at
weather.gov/erh/gis.

The NWS is seeking comments until November 30, 2026, on the proposed
termination of the Experimental NWS Graphics site at
<http://weather.gov/erh/gis>. The Experimental site displays GIS based
graphics of weather and water data listed by Regions, WFOs, FEMA regions,
and States. The third party server software used to create the graphics
is no longer supported and will be retired.

The National Weather Service plans to discontinue the experimental
graphics site on or about December 15, 2026. There is no direct
replacement, however all other existing sources and graphics for weather
hazards will continue to be available, including:

- NWS GIS Viewer: <https://viewer.weather.noaa.gov/>
- National Digital Forecast Database (NDFD) at:
<https://digital.weather.gov>
- NWS Data and Web Service Catalog at:
<https://water.noaa.gov/about/data-and-web-services-catalog>
- Weather Prediction Center graphics at:
<https://www.wpc.ncep.noaa.gov/index.shtml#page=ovw>

If you have any questions or feedback concerning these changes,
please contact:
