 -Emergency Managers Weather Information Network
 -NOAAPort
 Other NWS Partners, Users and Employees

From: Craig Hegemann
 NWS Chief Information Officer (Acting)

Subject: Amended: National Weather Service Facebook Presence

Amended to add six additional field sites where prototype
Facebook pages will soon be made available.

NWS is exploring expansion of its presence on Facebook.
Facebook is a commonly used social networking service which
allows participants to share information with other users. NWS
has already has an effective national Facebook presence for
purposes of outreach and education. NWS is now exploring
expansion of this presence to the field office level to include
provision of existing NWS products such as warnings.

Because exploration of possibilities for a local Facebook
presence cannot be done outside of the public Facebook
environment, our prototyping efforts will be publicly visible.

We are currently using Weather Forecast Office (WFO) Fort Worth,
TX for our preliminary prototyping efforts. Over the next
several months, prototype Facebook pages for the following
additional sites will be made available:

WFO Pleasant Hill, MO
WFO Seattle, WA
NWS Alaska Region
WFO New York City, NY
North Central River Forecast Center (Chanhassen, MN)
National Hurricane Center (Miami, FL)

Work on this local Facebook page is in preparation for an

experimental service that will be open for public comment/review. The period of prototyping, expected to last approximately through March 2011, will enable NWS staff to become proficient at maintaining a useful local Facebook presence and will allow a period of service adjustments as staff determine level of automation needed, type of information to post, and how to effectively address any problems. NWS will provide more information and initiation of a public comment and review period when a decision is made to offer this service on a more consistent basis.

Please note that as a prototype service, these Facebook pages may be discontinued at any time, the amount and content of information provided may change, and the frequency of updates posted to this page may vary and is not guaranteed.

Responses to fan posts are made on a time-available basis and may be extremely limited during periods of severe weather. In addition, users should not rely on this service as the primary means of receiving NWS alerts and warnings of hazardous weather. NWS alerts and warnings are available on NOAA Weather Radio and our official website:

<https://www.weather.gov/>

Disclaimers regarding NWS use of social media services can be found at:
