From:    Michelle Mainelli, Chief
         Systems Integration Branch
         NCEP Central Operations

Subject: Soliciting Comments until December 31, 2010, on the
         Experimental Model Analyses and Guidance Website

The National Centers for Environmental Prediction (NCEP) is
seeking user comments on the new experimental Model Analyses and
Guidance (MAG) website, located at:

http://mag.ncep.noaa.gov

The MAG website showcases the NWS suite of graphical numerical
model analyses and guidance and observational database. The
experimental MAG was made available in June 2010. We are
seeking public comment through December 31, 2010. Comments on
the MAG may be provided at:

The MAG is an upgrade of the current experimental NCEP Model
Analysis and Forecast (MAF) site located at:

http://www.nco.ncep.noaa.gov/pmb/nwprod/analysis

Following a successful review and comment period, the MAG will
become operational and the experimental MAF site will be
discontinued.

More details about the MAG can be found in the Product
Description Document (PDD) located on the front page of the MAG
website.
For technical questions/comments about the MAG, please contact:

Bradley Mabe
