              NWS, National Operational Hydrologic Remote Sensing Center

Subject: Soliciting Comments until July 1, 2012 on NOHRSC Model Expansion  
and Forecast Experimental Products

NWS is accepting comments until July 1, 2012, on National Operational  
Hydrologic Remote Sensing Center (NOHRSC) model expansion and forecast  
experimental products.

The NOHRSC is implementing the following two model enhancements:

- Expanding the model's geospatial domain into Canada to include the Great  
Lakes drainage area.
  
- Executing the model in a 72-hour forecast mode where the first 18  
forecast hours are forced by output from the Rapid Refresh model and the  
remaining 54 hours are forced by output from the North American Mesoscale  
model.

Comments may be submitted on the NOHRSC website:

<http://www.nohrsc.noaa.gov/contact.html>

The feedback period for these experimental products and services extends  
from October 27, 2011 through July 1, 2012.
