Subject: Amended: Soliciting Comments on Experimental Storm
Prediction Center (SPC) Probabilistic Day 3-8 Fire Weather
Outlooks through September 29, 2015

Amended to extend comment period through September 29, 2015.

The NWS is continuing to collect comments through September 29,
2015, regarding six Fire Weather Outlook graphics for the
Conterminous United States (CONUS). These graphics are posted
on the SPC Website on an experimental basis.

These graphics were previously available for comment:

https://www.weather.gov/media/notification/pdfs/pns11prob_spc_fire.pdf

Feedback from the previous experimental period indicated that
the combined 3-8 day forecast graphic was difficult to
interpret. As an improvement, the SPC is now providing six
individual daily web graphics (Day 3, 4, 5, 6, 7 and 8) of the
two Probabilistic Fire Weather Outlooks:

Probability of Dry Thunderstorms Fire Weather Outlook
Probability of Strong Winds, Low Relative Humidity (RH), and
Warm Temperatures Fire Weather Outlook

These graphics are available on the SPC's Day 3-8 Fire Weather
Forecast webpage:

http://www.spc.noaa.gov/products/exper/fire_wx/

Feedback and comments concerning these experimental graphics are welcome through September 29, 2015, via a link on the webpage or online at:

<http://www.nws.noaa.gov/survey/nws-survey.php?code=spc38firewx>

More details regarding these elements are available in a Product Description Document (PDD) at:

<https://products.weather.gov/viewExperimental.php?selrow=434>
