NWS Pilot Program Manager

Subject: Seeking Public Comment and Review on the Experimental
Enhanced Data Display (EDD) through February 23, 2014

Through February 23, 2014, NWS is seeking public comment and review on the Experimental Enhanced Data Display (EDD). Developed at the Pilot Project at the NWS Weather Forecast Office in Charleston, WV, the EDD is a web-based cross-browser GIS viewer that provides a single interface to access a wide variety of NWS weather data in a Google maps format. There are many interactive components and tools provided with EDD that allow users to layer and manipulate the data to their needs. The experimental EDD service is online at:

<http://preview.weather.gov/edd>

Information on accessing and using EDD can be found under EDD's help menu in the upper right hand corner of the display.

Comments and feedback on EDD are welcome at:

<http://www.nws.noaa.gov/survey/nws-survey.php?code=EDD>

Comments will be collected from August 20, 2013, until February 23, 2014. At that time, NWS will evaluate feedback and determine whether to transition the EDD to operational status, discontinue it, or revise and extend the experimental feedback period.

For questions regarding this notice or EDD, please contact:

Jonathan Wolfe
Emergency Response Specialist
National Weather Service WFO RLX
