Subject: Soliciting Comments on the Experimental River Forecast
Center Decision Support Map Through January 1, 2014

NWS is seeking comments on the Experimental River Forecast Center (RFC) Decision Support Map through January 1, 2014. The NWS West Gulf RFC and Arkansas Red Basin RFC are testing a new Hydrologic Decision Support Map service that melds a variety of spatial data products on the same background map to aide analysis and decision making.

The Hydrologic Decision Support Map is a Google Map-based tool containing many of the data sets needed to make water resources, flood, and emergency management decisions, and provides stakeholders the flexibility to create customized maps and the ability to scale maps beyond a single RFC boundary.

The Decision Support Map and a description of how to use the map are available at:

<http://www.srh.noaa.gov/wgrfc/>
<http://www.srh.noaa.gov/abrhc/>

Users are encouraged to provide feedback on this experimental product by using the brief survey and comment form at:

<http://www.nws.noaa.gov/survey/nws-survey.php?code=RFCDSM>

or provide comments directly to sr-FWR.dsstool@noaa.gov.

More information on this product is online at:

<http://products.weather.gov/>
