National Weather Service Headquarters Washington DC  
1015 AM EST Wed Feb 5 2014

To: Subscribers  
-Family of Services  
-NOAA Weather Wire Service  
-Emergency Managers Weather Information Network  
-NOAAPORT  
Other NWS partners and NWS employees

From: Eli Jacks  
Chief, Fire and Public Weather Services Branch

Subject: Soliciting Comments until September 3, 2014, on the  
Experimental Graphical Weather Review Webpage from the  
NWS Corpus Christi, Texas, Weather Forecast Office

NWS is accepting comments until September 3, 2014, on the  
Experimental Graphical Weather Review Webpage from the Corpus  
Christi (CRP), Texas, Weather Forecast Office (WFO).

[www.nws.noaa.gov/survey/nws-survey.php?code=GWRWCRP](http://www.nws.noaa.gov/survey/nws-survey.php?code=GWRWCRP)

WFO CRP will produce daily high temperature, daily low  
temperature, and daily rainfall PNG graphics and KMZ files for  
the South Texas region:

<http://www.srh.noaa.gov/crp/graphicalweather.php>

The raw data used in these PNG graphics and KMZ files comes from  
official WFO CRP text products:

Miscellaneous Hydrologic Data Report (RRMCRP)  
Temperature and Precipitation Summary for South Texas (RTPCRP)  
COCRAHS Precipitation Summary (LCOCRP)

The rainfall shapefile

<http://water.weather.gov/precip/download.php>

from the national Advanced Hydrologic Prediction Service (AHPS)  
is used in the generation of the daily rainfall graphics and KMZ  
files.

The raw data is merged with various geographical features, as  
well as customized color tables, to produce the PNG graphics and  
KMZ files.

The current rainfall PNG graphic and KMZ files are available

daily at approximately 1800 Coordinated Universal Time (UTC).

Users may also retrieve past temperature and rainfall files using the calendar feature at the top of the webpage.

More detailed information is available in the product Description Document (PDD) on line at:

<http://products.weather.gov/viewliste.php>
