Subject: Soliciting Comments until March 28, 2014 on Proposed Changes to  
NWS Point Forecast Icons

NWS is accepting comments until March 28, 2014 on proposed changes to the  
icons we use to depict forecast weather conditions on our Point Forecast  
webpages.

Below is an example of a current Point Forecast Page for a point near  
Washington, DC. The forecast icons are found just beneath the text "2  
Miles ESE Washington, DC":

[http://forecast.weather.gov/MapClick.php?x=265&y=113&site=lwx&zmx=1&zmy=1&map\\_x=264.6000061035156&map\\_y=113.13333129882812#.UvogL7Rn1WQ](http://forecast.weather.gov/MapClick.php?x=265&y=113&site=lwx&zmx=1&zmy=1&map_x=264.6000061035156&map_y=113.13333129882812#.UvogL7Rn1WQ)

These changes are intended to enhance communication of rapidly changing  
weather conditions, while also highlighting current weather hazards, by:

- Using a new set of icon images designed to be more visually discernable.
- Changing the current temporal display (only one icon shown for each 12-hour period) to a combination of single and, when appropriate, dual, 6-hourly icons; in this proposal, dual icons would be used only when rapidly changing weather conditions within 12-hour periods dictate their use, and only for the first four days of the forecast period.
- Creating new text phrases to be placed underneath the dual icons to describe these changing weather conditions (e.g., "morning sun then afternoon showers"); some of the new phrases under the dual icons would be shortened (e.g., "mostly sunny" becomes "sunny") due to space restrictions; however, complete phrases would remain available via icon mouse over, as with the currently operational Point Forecast pages.
- Adding yellow, red and orange blocks around the icons to indicate when Watches, Warnings and Advisories (WWAs), respectively, are in effect.

The following link displays sample pairs of current and proposed new sets of icons. These examples have been designed to depict a variety of high-

impact weather scenarios. For each pairing, the top row shows how the icons appear today on the Point Forecast pages, while the second row shows how the proposed new set of icons would appear for the same scenario.

Please submit comments to the following link:

[www.nws.noaa.gov/survey/nws-survey.php?code=PNPCI](http://www.nws.noaa.gov/survey/nws-survey.php?code=PNPCI)

Partners and users are encouraged to focus on following questions in the survey:

-Question 3: Please include comments to let us know what you like about the proposed alternative.

-Question 4: Please include comments to let us know what you do not like.

-Question 8: Let us know if you support a change to the proposed new icons.

NWS will review and analyze the feedback collected during this comment period and determine whether to implement the proposed changes to the icons. A Public Information Statement will be issued if a decision is made to implement these changes along with a scheduled date for implementation.
