Other NWS Partners, Users, and Employees

FROM: Edward R. Johnson
Director, NWS Strategic Planning and Policy Office

SUBJECT: Seeking Input by July 3, 2014, on Expanded
Access to National Weather Service Numerical Weather
Prediction Model Information

Please ignore an earlier send of this notice indicating it was a correction.

The NWS is considering providing more comprehensive access to NWS operational numerical weather prediction (NWP) model information. NWS runs operational NWP models on high-performance computers, and samples these models during their execution to produce and disseminate the model output products used by NWS and the entire weather enterprise. NWS is proposing to create an environment to help determine methods by which data from these models may be accessed in higher detail in time and space, as well as access to additional NWP data that are not currently provided.

Detailed information on this proposal is provided at:

http://weather.gov/sp/OEIS_proposal.pdf

NWS is currently seeking input on this proposal and requests for additional data sets to be provided by NWS. Input and requests may be provided to the following contact, by July 3, 2014:

Ben Kyger
Director, NCEP Central Operations
ben.kyger@noaa.gov
