FROM: Michelle Hawkins
Chief, Fire, Public, Severe, and Winter Weather
Services Branch

SUBJECT: Updated: Soliciting Comments until April 30, 2017,
on the Expansion of Experimental Probabilistic
Storm Total Snow Products beginning on or about
December 7, 2016

Updated to correct links on Product Description Document(PDD).

Effective on or about Wednesday, December 7, 2016, 26
additional WFOs will start producing probabilistic storm total
snow products ahead of anticipated winter storms. These offices
will join the 18 offices which issued the products last winter.

The graphical products will be available online starting on or
about Dec 7, 2016, at the following 44 office webpages:

Aberdeen, SD: <http://www.weather.gov/abr/winter>

The comment period runs from Dec 7, 2016, through April 30, 2017. Please submit comments to:

www.nws.noaa.gov/survey/nws-survey.php?code=NWS/PSTS/FY16

Graphical and tabular products will show the least, most likely and largest snow amounts a storm is likely to produce. Examples of these products can be viewed at:

<http://products.weather.gov/PDD/ProbSnowPDD.pdf>

Narrow ranges between the minimum and maximum snowfall totals indicate high forecast certainty while large ranges between minimum and maximum totals indicate low forecast certainty.

If you have questions or feedback, please contact:

National Representative
