From: Eli Jacks
 Chief, Forecast Services Division

Subject: Soliciting Comments until September 15, 2017 on the Experimental
Post Wildfire Debris Flow and Flash Flood Webpage

Effective on or before September 15, 2016, the NWS Western Region Headquarters in Salt Lake City, UT, will produce experimental information on recent burn scars that pose an increased risk to life and property. The webpage includes an overview page showing burn scars across the Western United States. Individual burn scars linked from the overview page will have their individual webpages. Burn scar specific webpage(s) will provide more detailed information, including a map of the burn scar, road, communities, and other values at risk. Public safety information will be included to educate and inform the public.

The webpage can be accessed at:

<http://www.wrh.noaa.gov/wrh/postwildfire/>

Comments will be accepted from September 15, 2016, through September 15, 2017, via electronic survey at the following link:

www.nws.noaa.gov/survey/nws-survey.php?code=PWHAZARDS

For more information, please contact:
