Subject: Soliciting Comments on Changes to the NWS Forecast
 web site at forecast.weather.gov through
 November 15, 2016,

The National Centers for Environmental Prediction Central
Operations (NCO) is soliciting comments on changes to the Point
Forecast application at:
<http://forecast.weather.gov>

The purpose of these changes is to create a more usable
interface with no duplication of service to users while
providing a more modern service-oriented data structure.

The proposal to update the Point Forecast application will
alter/deprecate a significant number of Uniform Resource
Locators (URLs). Although in many cases the functionality is the
same, the structure of the new site requires modifications to
the URL. Users will be automatically redirected where possible
to ease this transition for public customers; however, partners
running automated processes to get NWS data from
forecast.weather.gov will need to make sure that either their
application properly follows these redirects or points directly
to the new URL. The following pages and their new equivalent
pages are below:
