              Acting Chief, Aviation and Space Weather Services Branch

Subject: Soliciting Comments on Proposed Termination of Terminal  
Aerodrome Forecasts (TAFs) at the following Locations: Gage, OK (KGAG)  
and Hobart, OK (KHBR), through January 15, 2018

NWS is proposing termination of TAFs at Gage, OK, and Hobart, OK. Over the past several years, airport statistics show that aircraft operations per day have dropped to two and five operations for Gage, OK (KGAG) and Hobart, OK (KHBR) respectively. Aircraft operations have risen at other airports across the region, so plans are underway to add TAFs to some of these locations at a later date.

These TAFs are currently found in the following World Meteorological Organization (WMO) headers available to commercial and international customers:

Airport Name -----	WMO Heading -----	AWIPS ID -----
Gage	FTUS80 KWBC FTUS23 KWBC	TAFGAG
Hobart	FTUS80 KWBC FTUS23 KWBC	TAFHBR
