From: Kevin Stone
 Acting Chief, Aviation and Space Weather Services
 Branch

SUBJECT: Soliciting comments on proposed termination of
 Terminal Aerodrome Forecasts (TAFs) at the following
 locations, Gage, OK (KGAG) and Hobart, OK (KHBR)
 through January 15, 2018.

NWS is proposing termination of TAFs at Gage, OK, and Hobart,
OK. Over the past several years airport statistics show that
aircraft operations per day have dropped to two and five
operations for Gage, OK (KGAG) and Hobart, OK (KHBR)
respectively. Aircraft operations have risen at other airports
across the region, so plans are underway to add TAFs to some of
these locations at a later date.

These TAFs are currently found in the following WMO headers
available to commercial and international customers:

Airport Name	WMO Heading	AWIPS ID
-----	-----	-----
Gage	FTUS80 KWBC	TAFGAG
FTUS23 KWBC		
Hobart	FTUS80 KWBC	TAFHBR
	FTUS23 KWBC
