Subject: NWS Hazard Simplification Project: Collecting Public
 Comment on the Proposed Consolidation and Reformatting
 of NWS Flood Hazard Messaging Products through
 September 7, 2018

Through September 7, 2018, NWS is collecting comments on a proposed consolidation (i.e., reduce the number) and reformatting (i.e., simplified product text) of flood-based Watches, Warnings and Advisories (WWA) for River Flood, Areal Flood, Coastal Flood, and Lakeshore Flood products.

A listing of the specific proposals along with examples of the proposed consolidated and reformatted messages is contained in the Product Description Document at the link below:

https://products.weather.gov/PDD/PDD_Flood_HazSimp_v2.pdf

The survey is available at the following link and will remain open through September 7, 2018:

<https://www.surveymonkey.com/r/Flood18>

Based on feedback received, NWS may implement some or all of the proposals in early 2020. A Service Change Notice with minimum 75-day lead time would be issued in advance of any operational changes.
