Service Change Notice 10-38, Corrected  
National Weather Service Headquarters Washington DC  
1027 AM Wed Dec 22 2010

To: Subscribers:  
-Family of Services  
-NOAA Weather Wire Service  
-Emergency Managers Weather Information Network  
-NOAAPORT  
Other NWS partners and employees

From: Eli Jacks  
Chief, Fire and Public Weather Services Branch

Subject: Corrected Date: Rolling software implementation  
date for Preliminary Local Storm Report Weather Event  
Types and Event Sources with completion scheduled for  
June 30, 2011

Corrected to change date in subject line to 2011.

Between December 1, 2010 and June 30, 2011, NWS Weather Forecast  
Offices will add six new weather event types and two new event  
sources to their Preliminary Local Storm Report (LSR) product.  
Full implementation has been delayed to accommodate changes to  
baseline AWIPS software as well as non-AWIPS LSR producing  
software. The original Service Change Notice follows:

Effective Wednesday, December 1, 2010, at 1800 Coordinated  
Universal Time (UTC), all NWS Weather Forecast Offices (WFOs)  
will change their Preliminary Local Storm Report (LSR) product  
to add six new weather event types and two new event sources.

The new weather event types are:

VOLCANIC ASHFALL  
TSUNAMI  
DEBRIS FLOW  
COASTAL FLOOD  
LAKESHORE FLOOD  
SNEAKER WAVE

The new event sources are:

COCORAHS  
911 CALL CENTER

Current weather event types and event sources are listed  
in NWSI 10-517, Multi-Purpose Weather Products Specification,  
Appendix B, available online at:

<http://www.weather.gov/directives/sym/pd01005017curr.pdf>

NWSI 10-517 will be updated with the new weather event types and event sources during its next update.

No changes are being made to the WMO headers, AWIPS IDs or format of the LSR product.
