Subject: Discontinuation of the Coded Cities Forecast (CCF) for Five of
Six NWS Regions: Effective March 15, 2011

Effective Tuesday, March 15, 2011, NWS will discontinue the Coded Cities Forecast (FPaa4i CCCC, CCFXXX) for five of six regions: Alaska, Central, Eastern, Pacific and Western. All Weather Forecast Offices (WFOs) in the NWS Southern Region (SR) will continue issuing the CCF. A listing of all NWS WFOs, by region, is online at:

<http://www.nws.noaa.gov/organization.php>

Continuation/discontinuation of the CCF on a NWS Region-by-Region basis is a result of evaluation of comments received from a Public Information Statement (PNS) issued in July 2009 soliciting comments through December 31, 2009:

https://www.weather.gov/media/notification/pdfs/pns09ccf_discontinuance.pdf

The above mentioned five NWS Regions determined other products, like the extensible markup language (XML) products (RXUS30 KWBN, XF03DY, and RXUS30 KWBN, XF07DY) and the Point Forecast Matrices (FOaa5i CCCC, PFMXXX), meet partner and user needs. SR determined their partners and users still need the CCF.

If you have questions, please contact:
