From: Therese Z. Pierce  
Chief, Marine and Coastal Services Branch

SUBJECT: Probabilistic Tropical Cyclone Storm Surge Exceedance  
Products Become Operational: Effective June 1, 2011

Effective June 1, 2011, the Tropical Cyclone Probabilistic Storm Surge Exceedance products will become operational. The products provide storm surge heights, in feet above normal tide level, and the probabilities, from 10 to 90 percent at 10 percent increments, of storm surge exceeding the displayed height.

The products are produced when a hurricane watch or warning are in effect for any portion of the Gulf or Atlantic coasts of the continental United States. The products will be posted online at:

<http://www.weather.gov/mdl/psurge>

GRIB2 and ESRI shape files will be available at this web site by clicking on the download tab.

GRIB2 files will also be available on NOAAPORT with the following WMO headers:

LGXP10 KNHC	10 percent chance of exceedance
LGXP20 KNHC	20 percent chance of exceedance
LGXP30 KNHC	30 percent chance of exceedance
LGXP40 KNHC	40 percent chance of exceedance
LGXP50 KNHC	50 percent chance of exceedance
LGXP60 KNHC	60 percent chance of exceedance
LGXP70 KNHC	70 percent chance of exceedance
LGXP80 KNHC	80 percent chance of exceedance
LGXP90 KNHC	90 percent chance of exceedance

In addition, the GRIB2 products will be available in the National Digital Guidance Database (NDGD). The directory of where the products can be found will change as from:

<ftp://tgftp.nws.noaa.gov/SL.us008001/ST.expr/DF.gr2/DC.ndgd/GT.sl>

osh/AR.conus/

To (effective June 1, 2011):

<ftp://tgftp.nws.noaa.gov/SL.us008001/ST.opnl/DF.gr2/DC.ndgd/GT.sl>  
osh/AR.conus/

No change in the file names will occur. The GRIB2 file names of ds.surgeexcdNN.bin, where NN is the exceedance probability 10 through 90 percent in increments of 10, will continue to be used.

If June 1, 2011 is declared a Critical Weather Day by the National Centers for Environmental Prediction, the implementation date for transitioning the storm surge probabilities in the NDGD to operational will be postponed. Users will be notified of that decision via another Technical Implementation Notice and a new implementation date will be established.
