 Other NWS Partners, Users and Employees

From: Wayne Higgins, Director
 Climate Prediction Center

Subject: Format of U.S. Hazards and Global Tropics Hazards Assessments:
Effective September 12, 2011

The U.S. Hazards Assessment and the Global Tropics Hazards and Benefits Assessment names will be changed. The term "Assessment" will be replaced with "Outlook".

The format of the U.S. Hazards Assessment will also change. The new format will separate the product forecast period, covering 3-14 days into the future, into two forecast periods:

3-7 days into the future
8-14 days into the future

The four maps will be produced for each forecast period:

Precipitation-related Hazards
Temperature/Wind-related Hazards
Drought/Wildfire-related Hazards
Composite of all Hazards

The content of the maps will be similar to the ones produced now for this product.

U.S. Hazards Assessment:
