FROM: Jason Tuell  
Acting Director  
Office of Climate, Water and Weather Services

SUBJECT: Discontinuation of Space Weather Advisory Bulletin  
Effective October 5, 2012

Effective Friday, October 5, 2012, at 9:00 AM Mountain Daylight Time (MDT), 1500 Coordinated Universal Time (UTC), the NWS Space Weather Prediction Center (SWPC) in Boulder, Colorado, will discontinue the Space Weather Advisory Bulletin.

Developed many years ago, the Space Weather Advisory Bulletin was designed to provide space weather information at a level appropriate for a general audience. Recently, however, SWPC added equivalent general audience text to its alert, warning, and watch products, tailored specifically for each category and type of space weather event. For this reason, the advisory bulletin is no longer needed.

SWPC alerts, warnings, and watches are online at:

<http://www.swpc.noaa.gov/alerts/index.html>.

To subscribe to these via email, please see:

<https://pss.swpc.noaa.gov/LoginWebForm.aspx?ReturnUrl=%2fproductsubscriptionservice%2f>.

Finally, additional notification and supplementary information is online in the "Top News of the Day" section at:

<http://www.swpc.noaa.gov/index.html>

The SWPC product below will be affected by this change:

AWIPS ID	WMO Header Name	Product Type	Change
-----	-----	-----	

SWXADVBUL NWXX05 KWNP Space Weather Discontinued  
Advisory Bulletin
