Subject: Changes to West Coast/Alaska Tsunami Warning Center (WCATWC)
Products: Effective November 1, 2012

Effective, Thursday, November 1, 2012, at 1800 Coordinated Universal Time (UTC), the WCATWC will implement changes to its tsunami products including formatting, readability, forecasts, and advice to customers. Two products are being eliminated.

The products listed in Tables 1-4 will use new formats. The products in Table 5 will be eliminated. There are no changes to headers or message definitions.

These changes are the first phase of a multi-phase approach to improve tsunami message content. Future phases will include input based on a social science review of the message content.

Table 1. The text above the segmentation in WCATWC warning, advisory and watch products for Alaska, British Columbia, the United States (U.S.) West Coast, Gulf of Mexico coast, East Coast, Puerto Rico, the Virgin Islands and the eastern Canadian coast has been eliminated. Segmented content is adapted for text-to-speech usability for Weather Forecast Offices and other automated systems.
