SUBJECT: Removal of Experimental Southeastern U.S./Gulf of
Mexico Marine Weather Portal on November 30, 2012

Effective Friday, November 30, 2012, NWS will discontinue the
experimental Southeastern United States/Gulf of Mexico Marine
Weather Portal. This portal currently is online at:

<http://forecast.weather.gov/mwp/>

The portal has been operating in a degraded status since contract
support for the site ended last year. In addition, the operating
platform and data layers are outdated and thus are no longer
reliable.

Please send comments to:

David Soroka
