Subject: New Public Zones and Boundary Changes for Parts of Central and
Northeast Oregon and Southeast Washington: Effective December 3, 2013

Effective Tuesday, December 3, 2013, at 1200 Coordinated Universal Time (UTC), 4:00 AM Pacific Standard Time (PST), NWS Weather Forecast Office (WFO) Pendleton (PDT), OR, will make modifications to some of its public zones to better represent climatological conditions and to follow terrain features more closely.

The main change will be to split ORZ042 (North Central Oregon) into a northern and southern part forming two new zones (ORZ510 and ORZ511). In addition, the metropolitan area of Bend, Oregon, will be included in the new southernmost zone (ORZ511) - Central Oregon) and removed from OZ509 (East Slopes of the Oregon Cascades) because of its lower average annual snowfall.

Minor border adjustments will also be made to:

WAZ024 (Eastern Columbia River Gorge of Washington)
WAZ520 (East Slopes of the Washington Cascades)
WAZ521 (Simcoe Highlands)
ORZ041 (Eastern Columbia River Gorge of Oregon)
ORZ044 (Lower Columbia Basin of Oregon).

A map and detailed explanation of these changes is online at:
