NOUS41 KWBC 302000 CCB PNSWSH

Service Change Notice 13-68 Corrected National Weather Service Headquarters Washington DC 400 PM EDT Tue Oct 30 2013

- To: National Weather Service (NWS) Offices Federal Aviation Administration (FAA) Customers Family of Services (FOS) Subscribers Other Customers of NWS Aviation Forecasts
- From: Cynthia Abelman Chief, Aviation Services Branch

Subject: Corrected: Change of Name and Identifier for the Jackson, MS, VHF Omnidirectional Radio Range (VOR) Aviation Radio Navigation Site: Effective December 3, 2013

Note: The following changes have no impact on NOAA Weather Wire Service subscribers.

Corrected to change effective date to December 3, 2013.

Effective Tuesday, December 3, 2013, at 1500 Coordinated Universal Time (UTC), 10:00 AM Eastern Standard Time, the NWS will cease using the 3-letter identifier JAN and begin using the 3-letter identifier of MHZ.

On August 22, 2013, the Federal Aviation Administration (FAA) changed the name of the Jackson VOR from Jackson to Magnolia. With this name change, the 3-letter identifier changed from JAN to MHZ. The physical location of the VOR also changed. The new location coordinates of the VOR are N32°26.04', W90°05.99'.

VORs are used by pilots for navigation and also used in aviation weather forecasts and Significant Meteorological Information (SIGMETs) as reference points in defining the area of weather hazards. Because NWS uses VOR locations to define areal coverage of weather hazards in addition to their use as navigation aids, the NWS will make this name and identifier change to maintain consistent terminology.
