From: Mark Tew
Chief, Marine and Coastal Weather Services Branch

Subject: Changes to the text Tropical Weather Outlook effective
May 15, 2014

Effective May 15 2014, the following changes to the text
Tropical Weather Outlook (TWO) will take place:

1. Extended (5-day) Tropical Weather Outlook (TWO) becomes operational at the National Hurricane Center (NHC). The experimental 120-hour genesis probabilities that were embedded within the TWO for the Atlantic and east Pacific basins during the 2013 hurricane season will become operational.
2. NHC and Central Pacific Hurricane Center (CPHC) will provide the genesis probabilities in a semi-tabular form immediately following the discussion instead of embedding it within the discussion.
3. The TWO will be issued by NHC and CPHC in mixed case on an experimental basis. For additional details please see the following Public Information Notice:

http://www.nws.noaa.gov/om/notification/pns14cphc_mixed_case.txt

An example of the changes to the TWO can be found at:

http://www.nhc.noaa.gov/news/20140228_hsu_twoChanges.php

The TWO is available online at:

Atlantic and east Pacific

<http://www.nhc.noaa.gov>

Central Pacific

<http://www.prh.noaa.gov/cphc>

The WMO headers and AWIPS Identifiers (AI) for the text TWO are:

Basin	WMO Header	AI
Atlantic	ABNT20 KNHC	MIATWOAT
east Pacific	ABPZ20 KNHC	MIATWOEP
central Pacific	ACPN50 PHFO	HFOTWOCP
