From: John Murphy
 Director, NWS Office of Science and Technology

Subject: Termination of USRCRN Observation Data on or about June 1, 2014

Funding for the U.S. Regional Climate Reference Network (USRCRN) was terminated as part of the FY14 Omnibus budget law. As a result, preparations are underway to begin decommissioning the network. The first step in this process will be to deactivate the data feed to NWS websites. Site data from USRCRN sites in Colorado, Utah, New Mexico and Arizona will cease to be ingested and recorded by NWS. This deactivation is expected to occur on, or about June 1, 2014.

This action is the first step in the decommissioning process. Additional steps are being planned for the eventual removal of these USRCRN sites. Information on the USRCRN program can be found at:

<http://www.ncdc.noaa.gov/crn/usrcrn/>
