From: Mark Tew
Chief, Marine and Coastal Weather Services Branch

Subject: Experimental Satellite Rainfall Quantitative
Precipitation Estimates (QPE) Text Product will
transition from experimental status to operational
status effective September 1, 2014

Beginning September 1, 2014, the NWS National Hurricane Center (NHC) Tropical Analysis and Forecast Branch (TAFB) will provide, on an operational basis, the event-driven Satellite Rainfall QPE text product for tropical cyclones and tropical disturbances within the NHC and Central Pacific Hurricane Center areas of responsibility. The text product replaces the text Satellite Tropical Disturbance Rainfall Estimate Product NWS discontinued on July 16 2013.

The text product will be issued under the following AWIPS/WMO headers.

-MIASTDECA/TCCA21 KNHC, for systems in the Caribbean east of 67W
-MIASTDCCA/TCCA22 KNHC for systems between 67W and 80W
-MIASTDWCA/TCCA23 KNHC for systems west of 80W

Users should ensure their systems can receive these products.

The Satellite Rainfall QPE text product can also be viewed at
