-NOAAPORT
Other NWS Partners and NWS Employees

From: Eli Jacks
Acting Chief, Forecast Services Division

Subject: Discontinue the Experimental Tropical Cyclone
Impact Graphics (TCIG) and Experimental Hurricane
Local Statement (HLS) Interactive Text Reader
Effective June 1, 2015

Effective June 1, 2015, NWS will discontinue the experimental TCIG and the experimental HLS Interactive Text Reader. This product is being discontinued because of a format change to the HLS and the new WFO Hurricane Local Watch/Warning product for the Atlantic hurricane basin in 2015 (see SCN 14-66 and SCN 14-67). This format change will make these experimental web pages inoperative.

The NWS is developing a new, interactive tropical web site for the Atlantic hurricane basin using NWS Weather Forecast Office (WFO) issued tropical cyclone products. This web site will provide users information on threats (wind, flooding rain, storm surge, and tornadoes), along with their potential impacts. Plans are to implement this new web site on an experimental basis sometime during the 2015 hurricane season. A Public Information Notice will be issued when the interactive web site becomes available.

For questions regarding this notice, please contact:

John Kuhn
NWS Marine, Tropical, and Tsunami Services Branch
Silver Spring, MD 20910
