 Other NWS Partners, Users and Employees

From: William Bauman
 Chief, Aviation and Space Weather Services Branch

Subject: Legacy Aviation Weather Center Webpages (ADDS) and Java Applets
No Longer Available: Effective June 30, 2016

Effective Thursday, June 30, 2016, at 1500 Coordinated Universal Time (UTC), the legacy Aviation Weather Center webpages listed at <http://www.aviationweather.gov/info/legacy> and Java applets at <https://www.aviationweather.gov/adds> will no longer be publicly accessible. If a user attempts to access these legacy webpages after this date/time, the user will be automatically redirected. Additionally, the Java applets will no longer properly function with Java Release 9. As the Java applet has evolved, its Application Programming Interface (API) has also changed, to the point where it can no longer be reliably used since it significantly degrades Web browser performance and must be deprecated.

If users still want to use Java functionality, please visit the Flight Path Tool application:

<http://www.aviationweather.gov/flightpath>

Otherwise, users can access a variety of OpenLayers GIS applications readily available at:

<http://www.aviationweather.gov>

If you have questions regarding this Service Change, please contact:
